Summary of Qualification

- Eleven years of **research experience** in scientific laboratories of various disciplines such as **computational neuroscience**, **machine learning**, **neuromorphic computing**, **control theory**, and **robotics**.
- Strong **abilities** in combining and bridging different fields such as **machine learning**, **neuroscience**, **computer science** and **mathematics**.
- **Advanced mathematical skills**, especially in linear algebra, dynamical systems, signal processing and control theory.
- **Long experience in programming** in system and scripting languages.

Professional Experience

Data Science Architect
[adNomus](#) | San Jose (CA), USA

August 2019–Now

- Develop NLP algorithms with applications in context analysis.
- Analyze behavioral data.
- Use machine and deep Learning algorithms for time-series prediction.

Research Experience

Postdoc Researcher in Neuromorphic Computing and Machine Learning

[UCI](#) | Irvine (CA), USA

January 2016–July 2019

[Neuromorphic Machine Intelligence Lab](#)

- Research in stochastic deep neural networks.
- Developed a neuromorphic framework (<https://github.com/nmi-lab/NSAT>).
- Developed machine learning algorithms for neuromorphic devices.
- Co-developed algorithms for Brain-Machine Interface using machine learning and neuromorphic devices.
- Integrated neuromorphic sensors (DVS camera) with neuromorphic frameworks.

Postdoc Researcher in Neuroscience and Control Theory

[CentraleSupélec](#) | Gif-sur-Yvette, France

December 2013–December 2015

[Laboratoire des signaux et systèmes](#)

- Developed a mathematical model (neural fields with time delays) and a closed-loop simulation for Parkinson's disease treatment.
- Conducted theoretical work on non-linear retarded dynamical systems in a closed-loop setup.
- Co-developed software for spike-sorting (<https://github.com/gdetor/SPySort>).
- Developed Matlab software for on-line data processing on a Plexon recording device.

Python Instructor | [CentraleSupélec](#) | Gif-sur-Yvette, France

March 2014–April 2014

- Taught a course on the Python Programming Language.

Research Assistant in Computational Neuroscience

[INRIA-Nancy Grand Est](#) | Nancy, France

October 2010–October 2013

[CORTEX Team](#)

- Developed algorithms for self-organizing maps.
- Developed a mathematical model for the development of the somatosensory cortex.
- Studied attention mechanisms in the somatosensory cortex.
- Reproduced an *in vivo* experiment *in silico* to study self-organization in the brain.

Research Intern in Robotics

[FORTH](#) | Heraklion, Greece

May 2008–October 2008

[Computational Vision and Robotics Laboratory](#)

- Configuration and calibration of a HOAP3 humanoid robot.
- Applied biped locomotion algorithms on a HOAP3 robotic platform.

Research Intern in Systems Neuroscience

University of Crete | Heraklion, Greece

October 2007–April 2008

Laboratory of Systems Physiology and Computational Neuroscience

- Conducted EMG and EEG experiments for studying human tremor.
- EMG and EEG recordings, data processing and analysis.
- Software development for signal processing.
- Computational simulations of motor units.

Education

INRIA Nancy Grand-Est/The University of Lorraine, Nancy, France

Ph.D. in Computer Science,

October 2010–October 2013

- Thesis Topic: *Cortical plasticity, dynamic neural fields, and self-organization*.
- Area of Study: Computational Neuroscience.

The University of Crete, Heraklion, Greece

M.Sc. in “Brain & Mind Sciences”

January 2007–January 2009

B.Sc. in Applied Mathematics

September 2002–September 2006

- Mathematical methods and software development track.

Communication Skills

Languages:

- Greek-native language,
- English-full professional proficiency,
- French-intermediate working proficiency,
- German-elementary proficiency.

Software Skills

Programming:

- C, C++, Python, Fortran, Java, Pascal, UNIX shell scripting, GNU make, SQL, HTML.
- CSS, Bootstrap.
- Matlab/Octave, Maple.
- Scikit-learn, LAPACK/BLAS, Sundials, OpenMP, OpenCV, Nvidia CUDA, MPI.

Deep Learning Frameworks:

- PyTorch, TensorFlow.

Natural Language Processing Frameworks:

- spaCy.

Simulators:

- Brian, Neuron (Python).

Version Control and Software Configuration Management:

- Git and SVN.

Devops:

- Gitlab CI/CD configuration.

Desktop Editing and Productivity Software:

- Vim, \LaTeX (\LaTeX , Bib \TeX , Tikz), Microsoft Office, Graphviz, GIMP, Inkscape, Scribus.

Operating Systems:

- Linux and BSD, Microsoft Windows family, Apple OS X.

Expertise

Mathematics:

- Linear and Nonlinear Dynamical Systems, Control Theory, Numerical Analysis, Linear Algebra, Probability Theory, Theory of Systems and Signals, Information Theory, Optimization, and Empirical Dynamic Modeling.

Computer Science:

- Deep Learning, Machine Learning, Natural Language Processing, Neural Networks, Neuromorphic Computing, Software Development, Evolutionary Computing, Theory of Algorithms.

Neuroscience:

- Systems Neuroscience, Computational Neuroscience, Cognitive Science.

Software

Major contributor in open source projects

- **GAIM** A C++ library for Genetic Algorithms and Island Models.
Gitlab link: https://gitlab.com/gdetor/genetic_alg.
- **NSAT** A C/Python simulator for the Neural and Synaptic Array Transceiver (NSAT) neuromorphic framework.
Github link: <https://github.com/nmi-lab/NSAT>.
- **NSATcarl** A C++ interface of CARLsim (<http://www.socsci.uci.edu/~jkrichma/CARLsim/>) for the NSAT neuromorphic framework.
Github link: <https://github.com/gdetor/CarlNsat>.
- **SPySort** A Python package for spike sorting.
Github link: <https://github.com/gdetor/spysort>.

Recording Techniques

Noninvasive:

- Electroencephalography (EEG) – Conducted EEG recordings using an 18-electrodes portable EEG device.

Invasive:

- Extracellular recordings – Set up, calibration and software development on a Plexon Recording Device.
- Electromyography (EMG) – Conducted muscle force and motor units (MUs) activity recordings.

Talks

- **Biologically plausible contrastive divergence: Towards an abstract complementary learning system**, Hughes Research Laboratory (HRL), Malibu CA (USA), 2017.
- **Closed-loop deep brain stimulation for Parkinson's disease: A computational study**, University of California Irvine, Irvine CA (USA), 2016.
- **Neural Fields 101**, CentraleSupélec, Gif-sur-Yvette (France), 2015.
- **The perception of touch: A computational approach**, Aix Marseille University, Marseille (France), 2014.
