

Georgios Is. Detorakis (GID), PhD

Contact Information	Postdoc Researcher Neuromorphic Machine Intelligence Lab University of California Irvine 2308 Social & Behavioral Sciences Gateway Building UC Irvine 92697-5100, CA, USA	+1 (949) 241 0844 ✉ gdetorak@uci.edu ✉ gdetor@protonmail.com 🌐 https://github.com/gdetor 🏠 cogsci.uci.edu/~gdetorak
Research Interests	Theoretical and computational neurosciences: Machine learning algorithms with applications on neuromorphic brain-inspired devices and brain-machine interfaces with applications in neurodegenerative disorders (Parkinson's disease). Cortical plasticity, memory and learning. Evolutionary computing with applications in machine learning and neuroscience.	
Academic Appointments	Postdoctoral Researcher January 2016 – Now Neuromorphic Machine Intelligence Lab , University of California Irvine <ul style="list-style-type: none">- Developed a neuromorphic framework and its simulator (https://github.com/nmi-lab/NSAT).- Developed machine learning algorithms.- Co-developed algorithms for Brain-Machine Interface using machine learning and neuromorphic devices.- Developed applications using neuromorphic sensors (DVS camera). Postdoctoral Researcher December 2013 – December 2015 Laboratoire des signaux et systèmes , Supélec , University Paris Sud <ul style="list-style-type: none">- Developed a neural model (nonlinear, delayed, neural field) and a closed-loop simulation for Parkinson's disease treatment.- Conducted theoretical work on non-linear retarded dynamical systems in a closed-loop setup.- Co-developed software for spike-sorting (https://github.com/gdetor/SPySort).- Developed Matlab software for on-line data processing using a Plexon recording device.	
Education	The University of Lorraine , Lorraine, France Ph.D. , INRIA Nancy Grand-Est , October 2010 – October 2013 <ul style="list-style-type: none">• Thesis Topic: <i>Cortical plasticity, dynamic neural fields and self-organization</i>.• Adviser: Dr. Nicolas P. Rougier• Area of Study: Computational Neuroscience. The University of Crete , Heraklion, Hellas M.Sc. , Faculty of Medicine , January 2007 – January 2009 <ul style="list-style-type: none">• Interdisciplinary two-years graduate program in "Brain and Mind Sciences".• Area of Study: Neuroscience. B.Sc. , Department of Applied Mathematics , September 2002 – September 2006 <ul style="list-style-type: none">• Four years undergraduate program.• Specialization in mathematical methods and software development.	
Travel Grants	<ul style="list-style-type: none">• Federation of European Neuroscience Societies (FENS), Regional Meeting 2015, Thessaloniki, Greece (€500).• Organization for Computational Neurosciences, CNS 2013 Annual Meeting, Paris, France (\$ 200).	
Student Advising	<ul style="list-style-type: none">• Undergraduate students in Engineering, CentraleSupélec, Gif-sur-Yvette, France. Primary adviser: Prof. Antoine Chaillet.• Graduate (master) internship student in INRIA Nancy Grand-Est, Lorraine, France. Primary adviser: Dr. Nicolas P. Rougier.	

Teaching
Experience

Supélec, Gif-sur-Yvette, France

Guest Instructor for a crash course in Python.

March 2014 – April 2014

- Introduction to the Python Programming Language, Numpy, Scipy, and Matplotlib packages.

The University of Crete, Heraklion, Hellas

Teaching Assistant

Spring Semester 2006

- TEM 202: Undergraduate Algorithms' Theory.
- Instructor: Prof. M. Karavelas.
- Course tutoring.

Professional
Service

Workshop Service

- Co-organizer (with Prof. Antoine Chaillet) for a workshop on: "Neural Population Dynamics", Supélec, Gif-sur-Yvette, February 2015.

Referee Service

- *The ReScience journal*

Research
Experience

Supélec, Gif-sur-Yvette, France and **Université Paris Sud**, Orsay, France

Laboratoire des signaux et systèmes

Postdoc Researcher in Neuroscience & Control Theory December 2013 – December 2015

- Developed a neural model (nonlinear, delayed, neural field) and a closed-loop simulation for Parkinson's disease treatment.
- Conducted theoretical work on non-linear retarded dynamical systems in a closed-loop setup.
- Co-developed software for spike-sorting (<https://github.com/gdetor/SPySort>).
- Developed Matlab software for on-line data processing using a Plexon recording device.

INRIA - Nancy Grand Est, Nancy, France

CORTEX Team

Research Assistant in Computational Neuroscience

October 2010 – October 2013

- Developed a computational model for self-organizing maps.
- Developed a mathematical model for the development of the somatosensory cortex.
- Developed an attention mechanism for the self-organizing map.
- Reproduced an *in vivo* experiment *in silico* to study self-organization in the brain.

FORTH, Heraklion, Hellas

Computational Vision and Robotics Laboratory

Research Intern in Robotics

May 2008 – October 2008

- Configured and calibrated a humanoid robot (HOAP3).
- Applied biped locomotion algorithms on the robotic platform HOAP3.
- Developed demo simulations for the aforementioned robotic platform.

The University of Crete - Faculty of Medicine, Heraklion, Hellas

Laboratory of Systems Physiology and Computational Neuroscience

Research Intern in Systems Neuroscience

October 2007 – April 2008

- Conducting EMG and EEG experiments for studying human tremor.
- Developed software on Matlab for EMG signal processing and analysis.
- Analyzing EMG and EEG data.
- Developed simulations of motor units.

Professional
Experience

The University of Crete, Heraklion, Hellas

Member of Helpdesk Team

Autumn semester 2006

- Providing assistance and technical support to the users. Supervising the computer laboratories of the Departments of Mathematics and Applied Mathematics.

Other Meeting
Attendance

General Participant

- Workshop on *Neuromorphic Cognition Engineering*, Telluride, Colorado (USA), 2017.
- Summer school on *Neural Dynamics Approach to Cognitive Robotics III - A Hands-on*, Bochum (Germany), September 2012.

Software

Software with applications in Neuromorphic Systems:

- **NSATsim** A neuromorphic framework simulator written in C. The user interface is written in Python.
- **NSATcarl** A C++ interface of CARLsim (<http://www.socsci.uci.edu/~jkrichma/CARLsim/>) for a neuromorphic framework.

Software with applications in Neuroscience:

- **Crebral** A simple simulator for conductance-based neural networks written mainly in C. All the accompanied tools are written in Python. The source code is available at github: <https://github.com/gdetor/Crebral>.
- **SPySort** A Python package for spike sorting. The source code can be found at github: <https://github.com/gdetor/spysort>.
- **SI-RF-Structure** A collection of Python scripts that implements algorithms and experimental protocols relative to somatotomy of area 3b of primary somatosensory cortex. The source code is hosted at github: <https://github.com/gdetor/SI-RF-Structure>.
- **SITopMaps** A Python/C implementation of self-organizing maps with application on the somatotomy of area 3b of primary somatosensory cortex. The source code can be found at github: <https://github.com/gdetor/SITopMaps>.

Communication
Skills

Languages:

- Greek – native language,
- English – full professional proficiency,
- French – intermediate working proficiency,
- German – elementary proficiency (dead).

Software
Skills

Programming:

- C, C++, Python, Fortran, Java, Pascal, UNIX shell scripting, GNU make, SQL, Matlab/Octave, Maple, HTML, CSS, Bootstrap.
- Scikit-learn, LAPACK/BLAS, Sundials, OpenMP, Nvidia CUDA, MPI.

Deep Learning Frameworks:

- PyTorch, TensorFlow.

Simulators:

- Brian, Neuron (Python).

Version Control and Software Configuration Management:

- Git and SVN.

Desktop Editing and Productivity Software:

- Vim, T_EX (L^AT_EX, BibT_EX, Tikz), Microsoft Office, Graphviz, GIMP, Inkscape, Scribus.

Operating Systems:

- Linux and BSD, Microsoft Windows family, Apple OS X.

Recording
Techniques

Noninvasive:

- Electroencephalography (EEG) – Operation of portable EEG device consisting of 18 electrodes.

Invasive:

- Extracellular recordings – Set up, calibration and software development for extracellular recordings using a Plexon Recording Device.
- Electromyography (EMG) – Conducting muscle force and motor units (MUs) activity recordings.

Expertise

Mathematics:

- Linear and Nonlinear Dynamical Systems, Control Theory, Numerical Analysis, Linear Algebra, Probabilities Theory, Theory of Systems and Signals, Information Theory, Optimization, and Empirical Dynamic Modeling.

Computer Science:

- Deep Learning, Machine Learning, Neural Networks, Neuromorphic Computing, Software Development, Evolutionary Computing, Theory of Algorithms.

Computational Neuroscience:

- Spiking Neural Networks, Neural Population Models, Mathematical Modeling of Neural Systems.

Natural and Social Sciences:

- Neuroanatomy, Neurophysiology, Cognitive Neuroscience, Philosophy of Mind.

Talks

- [1] **"Biologically plausible contrastive divergence: Towards an abstract complementary learning system"**, Hughes Research Laboratory (HRL), Malibu CA (USA), 2017.
