

## Georgios Is. Detorakis (GID), PhD

---

### Contact Information

Data Science Architect  
adNomus Inc.  
75 EW Santa Clara St.,  
95113, CA, USA

☎ +1 (949) 241 0844  
✉ [george.detorakis@adnomus.com](mailto:george.detorakis@adnomus.com)  
✉ [gdetor@protonmail.com](mailto:gdetor@protonmail.com)  
🌐 <https://github.com/gdetor>  
🏠 [cogsci.uci.edu/~gdetorak](https://cogsci.uci.edu/~gdetorak)

### Research Interests

**Computational neurosciences and Machine Learning:** Machine learning algorithms with applications on neuromorphic brain-inspired devices and brain-machine interfaces with applications in neurodegenerative disorders (Parkinson's disease). Cortical plasticity, memory and learning. **Evo-  
lutionary Computing:** Genetic algorithms, island models and applications in the context of machine learning and neuroscience.

### Professional Experience

**adNomus Inc.**, Santa Clara, CA, USA

#### Data Science Architect

**August 2019–Now**

- Developing NLP algorithms with applications on context analysis.
- Deep learning algorithms for time-series forecasting.

### Academic Appointments

#### Postdoctoral Researcher

**January 2016 – July 2019**

**Neuromorphic Machine Intelligence Lab, University of California Irvine**

- Binary stochastic deep neural networks.
- Developed a neuromorphic framework and its simulator (<https://github.com/nmi-lab/NSAT>).
- Developed machine learning algorithms.
- Co-developed algorithms for Brain-Machine Interface using machine learning and neuromorphic devices.
- Developed applications using neuromorphic sensors (DVS camera).

#### Postdoctoral Researcher

**December 2013 – December 2015**

**Laboratoire des signaux et systèmes, Supélec, University Paris Sud**

- Developed a neural model (nonlinear, delayed, neural field) and a closed-loop simulation for Parkinson's disease treatment.
- Conducted theoretical work on non-linear retarded dynamical systems in a closed-loop setup.
- Co-developed software for spike-sorting (<https://github.com/gdetor/SPySort>).
- Developed Matlab software for on-line data processing using a Plexon recording device.

### Education

**The University of Lorraine**, Lorraine, France

**Ph.D.**, INRIA Nancy Grand-Est, **October 2010 – October 2013**

- Thesis Topic: *Cortical plasticity, dynamic neural fields and self-organization*.
- Adviser: **Dr. Nicolas P. Rougier**
- Area of Study: Computational Neuroscience.

**The University of Crete**, Heraklion, Hellas

**M.Sc.**, Faculty of Medicine, **January 2007 – January 2009**

- Interdisciplinary two-years graduate program in "Brain and Mind Sciences".
- Area of Study: Neuroscience.

**B.Sc.**, Department of Applied Mathematics, **September 2002 – September 2006**

- Four years undergraduate program.
- Specialization in mathematical methods and software development.

### Travel Grants

- Federation of European Neuroscience Societies (FENS), Regional Meeting 2015, Thessaloniki, Greece (€500).
- Organization for Computational Neurosciences, CNS 2013 Annual Meeting, Paris, France (\$ 200).

Student  
Advising

- Undergraduate students in Engineering, CentraleSupélec, Gif-sur-Yvette, France.  
Primary adviser: Prof. Antoine Chaillet.
- Graduate (master) internship student in INRIA Nancy Grand-Est, Lorraine, France.  
Primary adviser: Dr. Nicolas P. Rougier.

Teaching  
Experience

**Supélec**, Gif-sur-Yvette, France

**Guest Instructor** for a crash course in Python.

**March 2014 – April 2014**

- Introduction to the Python Programming Language, Numpy, Scipy, and Matplotlib packages.

**The University of Crete**, Heraklion, Hellas

**Teaching Assistant**

**Spring Semester 2006**

- TEM 202: Undergraduate Algorithms' Theory.
- Instructor: Prof. M. Karavelas.
- Course tutoring.

Professional  
Service

**Workshop Service**

- Co-organizer (with Prof. Antoine Chaillet) for a workshop on: "Neural Population Dynamics", Supélec, Gif-sur-Yvette, February 2015.

**Referee Service**

- [The ReScience journal](#)

Research  
Experience

**Supélec**, Gif-sur-Yvette, France and **Université Paris Sud**, Orsay, France  
[Laboratoire des signaux et systèmes](#)

**Postdoc Researcher in Neuroscience & Control Theory December 2013 – December 2015**

- Developed a neural model (nonlinear, delayed, neural field) and a closed-loop simulation for Parkinson's disease treatment.
- Conducted theoretical work on non-linear retarded dynamical systems in a closed-loop setup.
- Co-developed software for spike-sorting (<https://github.com/gdetor/SPySort>).
- Developed Matlab software for on-line data processing using a Plexon recording device.

**INRIA - Nancy Grand Est**, Nancy, France  
CORTEX Team

**Research Assistant in Computational Neuroscience**

**October 2010 – October 2013**

- Developed a computational model for self-organizing maps.
- Developed a mathematical model for the development of the somatosensory cortex.
- Developed an attention mechanism for the self-organizing map.
- Reproduced an *in vivo* experiment *in silico* to study self-organization in the brain.

**FORTH**, Heraklion, Hellas  
Computational Vision and Robotics Laboratory

**Research Intern in Robotics**

**May 2008 – October 2008**

- Configured and calibrated a humanoid robot (HOAP3).
- Applied biped locomotion algorithms on the robotic platform HOAP3.
- Developed demo simulations for the aforementioned robotic platform.

**The University of Crete - Faculty of Medicine**, Heraklion, Hellas  
[Laboratory of Systems Physiology and Computational Neuroscience](#)

**Research Intern in Systems Neuroscience**

**October 2007 – April 2008**

- Conducting EMG and EEG experiments for studying human tremor.
- Developed software on Matlab for EMG signal processing and analysis.
- Analyzing EMG and EEG data.
- Developed simulations of motor units.

Other Meeting  
Attendance

**General Participant**

- Workshop on *Neuromorphic Cognition Engineering*, Telluride, Colorado (USA), 2017.
- Summer school on *Neural Dynamics Approach to Cognitive Robotics III - A Hands-on*, Bochum (Germany), September 2012.

Software

**Software with applications in Neuromorphic Systems:**

- **NSATsim** A neuromorphic framework simulator written in C. The user interface is written in Python.
- **NSATcarl** A C++ interface of CARLsim (<http://www.socsci.uci.edu/~jkrichma/CARLsim/>) for a neuromorphic framework.

**Software with applications in Neuroscience:**

- **Crebral** A simple simulator for conductance-based neural networks written mainly in C. All the accompanied tools are written in Python. The source code is available at github: <https://github.com/gdetor/Crebral>.
- **SPySort** A Python package for spike sorting. The source code can be found at github: <https://github.com/gdetor/spysort>.
- **SI-RF-Structure** A collection of Python scripts that implements algorithms and experimental protocols relative to somatotomy of area 3b of primary somatosensory cortex. The source code is hosted at github: <https://github.com/gdetor/SI-RF-Structure>.
- **SITopMaps** A Python/C implementation of self-organizing maps with application on the somatotomy of area 3b of primary somatosensory cortex. The source code can be found at github: <https://github.com/gdetor/SITopMaps>.

**Software with applications in Optimization:**

- **GAIM** A C++ library for Genetic Algorithms and Island Models. The source code can be found at gitlab: [https://gitlab.com/gdetor/genetic\\_alg](https://gitlab.com/gdetor/genetic_alg).

Communication  
Skills

**Languages:**

- Greek – native language,
- English – full professional proficiency,
- French – intermediate working proficiency,
- German – elementary proficiency (dead).

Software  
Skills

**Programming:**

- C, C++, Python, Fortran, Java, Pascal, UNIX shell scripting, GNU make, SQL, Matlab/Octave, Maple, HTML, CSS, Bootstrap.
- Scikit-learn, LAPACK/BLAS, Sundials, OpenMP, Nvidia CUDA, MPI.

**Deep Learning Frameworks:**

- PyTorch, TensorFlow.

**Simulators:**

- Brian, Neuron (Python).

**Version Control and Software Configuration Management:**

- Git and SVN.

**Devops:**

- Gitlab CI/CD configuration.

**Desktop Editing and Productivity Software:**

- Vim,  $\text{\LaTeX}$  ( $\text{\LaTeX}$ , Bib $\text{\TeX}$ , Tikz), Microsoft Office, Graphviz, GIMP, Inkscape, Scribus.

**Operating Systems:**

- Linux and BSD, Microsoft Windows family, Apple OS X.

## Recording Techniques

### Noninvasive:

- Electroencephalography (EEG) – Operation of portable EEG device consisting of 18 electrodes.

### Invasive:

- Extracellular recordings – Set up, calibration and software development for extracellular recordings using a Plexon Recording Device.
- Electromyography (EMG) – Conducting muscle force and motor units (MUs) activity recordings.

## Expertise

### Mathematics:

- Linear and Nonlinear Dynamical Systems, Control Theory, Numerical Analysis, Linear Algebra, Probabilities Theory, Theory of Systems and Signals, Information Theory, Optimization, and Empirical Dynamic Modeling.

### Computer Science:

- Deep Learning, Machine Learning, Neural Networks, Neuromorphic Computing, Software Development, Evolutionary Computing, Theory of Algorithms.

### Computational Neuroscience:

- Spiking Neural Networks, Neural Population Models, Mathematical Modeling of Neural Systems.

### Natural and Social Sciences:

- Neuroanatomy, Neurophysiology, Cognitive Neuroscience, Philosophy of Mind.

## Talks

- [1] **“Biologically plausible contrastive divergence: Towards an abstract complementary learning system”**, Hughes Research Laboratory (HRL), Malibu CA (USA), 2017.
- [2] **“Closed-loop deep brain stimulation for Parkinson’s disease: A computational study”**, University of California Irvine, Irvine CA (USA), 2016.
- [3] **“Neural Fields 101”**, CenraleSupélec, Gif-sur-Yvette (France), 2015.
- [4] **“The perception of touch: A computational approach”**, Aix Marseille University, Marseille (France), 2014.
- [5] **“Coherent 6–10 Hz rhythms in muscle activities-Humanoid Robot & Biped Locomotion-EEG & Time Series Analysis”** in Bernstein Center for Computational Neuroscience, Freiburg (Germany), 2008.
