Research Interests

Computational Neurosciences and Machine Learning: Machine learning algorithms with applications on neuromorphic brain-inspired devices. Brain-machine interfaces with applications in neurodegenerative disorders (Parkinson's disease). Self-organization and attention mechanisms. Cortical plasticity, memory and learning. **Evolutionary Computing:** Genetic algorithms, island models and applications in the context of machine learning and neuroscience.

Professional Experience

adNomus Inc., Santa Clara, CA, USA

Data Science Architect

August 2019–Now

- Develop NLP algorithms with applications in context analysis.
- Analyze behavioral data.
- Use machine and deep Learning algorithms for time-series prediction.

Academic Appointments

Postdoctoral Researcher

January 2016 – July 2019

Neuromorphic Machine Intelligence Lab, University of California Irvine

- Research in stochastic deep neural networks.
- Developed a neuromorphic framework (<https://github.com/nmi-lab/NSAT>).
- Developed machine learning algorithms for neuromorphic devices.
- Co-developed algorithms for Brain-Machine Interface using machine learning and neuromorphic devices.
- Integrated neuromorphic sensors (DVS camera) with neuromorphic frameworks.

Postdoctoral Researcher

December 2013 – December 2015

Laboratoire des signaux et systèmes, Supélec, University Paris Sud

- Developed a mathematical model (neural fields with time delays) and a closed-loop simulation for Parkinson's disease treatment.
- Conducted theoretical work on non-linear retarded dynamical systems in a closed-loop setup.
- Co-developed software for spike-sorting (<https://github.com/gdetor/SPySort>).
- Developed Matlab software for on-line data processing on a Plexon recording device.

Education

The University of Lorraine, Lorraine, France

Ph.D., INRIA Nancy Grand-Est, October 2010 – October 2013

- Thesis Topic: *Cortical plasticity, dynamic neural fields and self-organization*.
- Adviser: **Dr. Nicolas P. Rougier**
- Area of Study: Computational Neuroscience.

The University of Crete, Heraklion, Hellas

M.Sc., Faculty of Medicine, January 2007 – January 2009

- Interdisciplinary two-years graduate program in "Brain & Mind Sciences".
- Area of Study: Neuroscience.

B.Sc., Department of Applied Mathematics, September 2002 – September 2006

- Four years undergraduate program.
- Specialization in mathematical methods and software development.

Travel Grants

- Federation of European Neuroscience Societies (FENS), Regional Meeting 2015, Thessaloniki, Greece (€500).
- Organization for Computational Neurosciences, CNS 2013 Annual Meeting, Paris, France (\$ 200).

Student Advising	<ul style="list-style-type: none"> - Supervised two undergraduate students in Engineering, CentraleSupélec, Gif-sur-Yvette, France. Primary adviser: Prof. Antoine Chaillet. - Supervised a postgraduate (M.Sc.) internship student in INRIA Nancy Grand-Est, Lorraine, France. Primary adviser: Dr. Nicolas P. Rougier.
Teaching Experience	<p>Supélec, Gif-sur-Yvette, France</p> <p>Guest Instructor for a crash course in Python. March 2014 – April 2014</p> <ul style="list-style-type: none"> - Introduction to the Python Programming Language, Numpy, Scipy, and Matplotlib packages. <p>The University of Crete, Heraklion, Hellas</p> <p>Teaching Assistant Spring Semester 2006</p> <ul style="list-style-type: none"> - TEM 202: Undergraduate Algorithms' Theory. - Instructor: Prof. M. Karavelas. - Course tutoring.
Professional Service	<p>Workshop Service</p> <ul style="list-style-type: none"> - Co-organizer (with Prof. Antoine Chaillet) of a workshop on: "Neural Population Dynamics", Supélec, Gif-sur-Yvette, February 2015. <p>Editorial Service</p> <ul style="list-style-type: none"> - The ReScience journal
Research Experience	<p>INRIA - Nancy Grand Est, Nancy, France</p> <p>CORTEX Team</p> <p>Research Assistant in Computational Neuroscience October 2010 – October 2013</p> <ul style="list-style-type: none"> - Developed algorithms for self-organizing maps. - Developed a mathematical model for the development of the somatosensory cortex. - Studied attention mechanisms in the somatosensory cortex. - Reproduced an <i>in vivo</i> experiment <i>in silico</i> to study self-organization in the brain. <p>FORTH, Heraklion, Hellas</p> <p>Computational Vision and Robotics Laboratory</p> <p>Research Intern in Robotics May 2008 – October 2008</p> <ul style="list-style-type: none"> - Configuration and calibration of a HOAP3 humanoid robot. - Applied biped locomotion algorithms on a HOAP3 robotic platform. <p>The University of Crete - Faculty of Medicine, Heraklion, Hellas</p> <p>Laboratory of Systems Physiology and Computational Neuroscience</p> <p>Research Intern in Systems Neuroscience October 2007 – April 2008</p> <ul style="list-style-type: none"> - Conducted EMG and EEG experiments for studying human tremor. - EMG and EEG recordings, data processing and analysis. - Software development for signal processing. - Computational simulations of motor units.
Other Meeting Attendance	<p>General Participant</p> <ul style="list-style-type: none"> - Workshop on <i>Neuromorphic Cognition Engineering</i>, Telluride, Colorado (USA), 2017. - Summer school on <i>Neural Dynamics Approach to Cognitive Robotics III - A Hands-on</i>, Bochum (Germany), 2012.
Software	<p>Software with applications in Neuromorphic Systems:</p> <ul style="list-style-type: none"> - NSAT A C/Python simulator for the Neural and Synaptic Array Transceiver (NSAT) neuromorphic framework (https://github.com/nmi-lab/NSAT). - NSATcarl A C++ interface of CARLsim (http://www.socsci.uci.edu/~jkrichtma/CARLsim/) with a neuromorphic framework (https://github.com/gdetor/CarlNsat).

Software with applications in Neuroscience:

- **Crebral** A simple C/Python simulator for conductance-based neural networks (<https://github.com/gdetor/Crebral>).
- **SPySort** A Python package for spike sorting (<https://github.com/gdetor/spysort>).
- **SI-RF-Structure** A collection of Python scripts that implement algorithms and experimental protocols for simulating area 3b of primary somatosensory cortex (<https://github.com/gdetor/SI-RF-Structure>).
- **SITopMaps** A Python/C implementation of self-organizing maps with applications on self-organization of area 3b of primary somatosensory cortex (<https://github.com/gdetor/SITopMaps>).

Software with applications in Optimization:

- **GAIM** A C++ library for Genetic Algorithms and Island Models (https://gitlab.com/gdetor/genetic_alg).

Communication Skills

Languages:

- Greek – native language,
- English – full professional proficiency,
- French – intermediate working proficiency,
- German – elementary proficiency.

Software Skills

Programming:

- C, C++, Python, Fortran, Java, Pascal, UNIX shell scripting, GNU make, SQL, Matlab/Octave, Maple, HTML.
- CSS, Bootstrap.
- Scikit-learn, LAPACK/BLAS, Sundials, OpenMP, OpenCV, Nvidia CUDA, MPI.

Deep Learning Frameworks:

- PyTorch, TensorFlow.

Natural Language Processing Frameworks:

- spaCy.

Simulators:

- Brian, Neuron (Python).

Version Control and Software Configuration Management:

- Git and SVN.

Devops:

- Gitlab CI/CD configuration.

Desktop Editing and Productivity Software:

- Vim, \LaTeX (\LaTeX , Bib \TeX , Tikz), Microsoft Office, Graphviz, GIMP, Inkscape, Scribus.

Operating Systems:

- Linux and BSD, Microsoft Windows family, Apple OS X.

Recording Techniques

Noninvasive:

- Electroencephalography (EEG) – Conducted EEG recordings using an 18-electrodes portable EEG device.

Invasive:

- Extracellular recordings – Set up, calibration and software development on a Plexon Recording Device.
- Electromyography (EMG) – Conducted muscle force and motor units (MUs) activity recordings.

Expertise

Mathematics:

- Linear and Nonlinear Dynamical Systems, Control Theory, Numerical Analysis, Linear Algebra, Probabilities Theory, Theory of Systems and Signals, Information Theory, Optimization, and Empirical Dynamic Modeling.

Computer Science:

- Deep Learning, Machine Learning, Natural Language Processing, Neural Networks, Neuromorphic Computing, Software Development, Evolutionary Computing, Theory of Algorithms.

Neuroscience:

- Systems Neuroscience, Computational Neuroscience, Cognitive Science.

Natural Sciences:

- Neuroanatomy and Neurophysiology.

Talks
